DETAILED ACTION

Election/Restriction:

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
Claims 1-12, drawn to an isolated soluble receptor comprised of a first subunit and a second subunit, each subunit comprising a specific amino acid sequence.
Each of the amino acid sequences is distinct from the other, because each sequence possess characteristic differences in structure that ^{are} distinct ^{and} which cannot be exchanged. Applicants must elect a single SEQ ID NO: for the first subunit and a single SEQ ID NO: for the second subunit.

Having shown that these inventions are distinct for the reasons given above and have acquired a separate status in the art by their recognized divergent subject matter as defined by MPEP § 1850. Therefore, an initial lack of unity for examination purposes as indicated is proper.

2. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
